WORK EXPERIENCE

Business Operations Intern | Fiserv | Fortune 215

June 2026 – August 2026

- Architected an end-to-end Operations Initiative Tracking system in Excel, enabling cross-departmental leads to log, escalate, prioritize, and track projects through completion.
- Authored Office.js automation scripts (leveraging Microsoft Copilot and internal AI) for history logging, delta tracking, automated ID assignment, and completed-project clearing.
- Integrated automation into Power Automate workflows with weekly execution, conditional Monday triggers, and automated executive status digest emails.
- Developed Power BI dashboards for VP- and Director-level stakeholders, providing real-time visibility into project health and operational bottlenecks during executive meetings.
- Contributed to the Fiserv Elevate initiative and supported the Fiserv–Zafin partnership through pricing analysis and data sourcing during a period of significant organizational change
- Collaborated cross-functionally with VPs, Directors, Project Managers, and Analysts on data cleansing, discrepancy resolution, and manual-entry audits across large operational datasets

Coding Instructor | Code Ninjas

June 2025 – Present

- Instruct students ages 5–14 in programming fundamentals across Microsoft MakeCode, JavaScript, C#, Unity, and GDScript, adapting delivery to individual skill levels
- Contributed to center achieving 87% trial-to-membership conversion rate — 50 points above the national average — through structured technical instruction and student engagement

Curriculum & Software Developer | Code Ninjas

August 2025 – Present

- Led cross-functional curriculum initiative with Code Ninjas Corporate to scope and deliver a new Unreal Engine learning pathway from the ground up
- Developed higher-level curriculum spanning five advanced learning modules centered on Godot game development; converted existing Unity C# projects to GDScript, demonstrating cross-platform technical versatility

PROJECTS

NinjaBux — Multi-Tenant Reward Platform — *Java, Spring Boot, TypeScript*

- Originally designed and built as a solo project during the Curriculum & Software Developer role at Code Ninjas; deployed across multiple locations supporting 20+ active student accounts with an immutable ledger-based transaction system and responsive TypeScript SPA with real-time REST API integration
- Currently leading migration effort in collaboration with Code Ninjas engineers to scale the platform for availability across all Code Ninjas dojos worldwide

C-CentLedger — Financial Tracking CLI — *C*

- Built a command-line financial ledger in C with a custom dynamic array (amortized $O(1)$ insertion), integer-cent currency precision, and category/amount-based sub-ledger queries; managed full memory lifecycle with zero leaks

EDUCATION

University of North Georgia

Expected December 2027

B.S. Cybersecurity | Double Major in Computer Science | GPA: 3.54 | Dean's List, Spring 2025

Relevant Coursework: Data Networks, Applied Cybersecurity, Computer Organization & Architecture, Script Programming

SKILLS

Programming: Python, SQL, Java, TypeScript, C, Bash

Business Intelligence & Automation: Power BI, Power Automate, Office.js, Excel

Developer Tools: Spring Boot, Git

Operations & Analytics: Process Automation, Dashboard Design, Data Cleansing, Stakeholder Reporting, Workflow Automation

Technical Concepts: REST APIs, JWT Authentication, RBAC
